

## OYEN SUMMER FAIR & STAMPEDE JULY 28

### World's Grain Exhibition and Conference

### Farmers Will Win \$210,750 in Prizes

The World's Grain Exhibition and Conference offer Canadian farmers an opportunity to share in cash prizes amounting to \$210,750.00. Contested in 50 competitive classes, open to the whole world, are 7,701 cash prizes. A few of the major awards follow:

\$5,500 a first prize for 50 pounds of wheat, 30 pounds of oats.  
\$1,500 for 40 pounds of barley, 50 pounds of rye.  
\$ 800 for 100 lbs. of corn.  
\$ 300 for 30 pounds of peas, 30 pounds of flax, 30 pounds of clover.

With this splendid opportunity before them, Canadian farmers should keep a watchful eye on their growing crops. They should start for special care those areas that appear most promising.

It should be understood that all seed and grain samples, if they are not already selected, will have to be found in crops of this year. All exhibits must be received by the Exhibition authorities on or before March 1, 1932.

Of vital importance to the advancement of Canadian agriculture will be the winning of World Championships in 1932 by farmers of Canada. Their seed and grain exhibit must demonstrate to the world the quality of Canada's field crops.

Select the classes from the prize list most suited to the crop you grow, then select your samples from the best you have.

It is best to make your entry NOW. Your sample for exhibit must be in the hands of the Secretary at Regina on or before March 1, 1932.

Valuable information relating to the preparation of grain and seed for exhibit may be secured by writing to the Secretary of the Provincial Grains and Seed Commission, Regina, or to the Secretary of the International Grains and Seed Commission, London, England.

Show what you grow and share what you know. On exhibition, the Secretary, World's Grain Exhibition and Conference, International Bank Building, London, England, will send you price lists, rules and regulations, complete information and all other information.

Chairman National Committee: HON. ROBERT WEBB, Minister of Agriculture, Canada.  
Chairman Executive and Finance Committee: HON. W. C. BUCKLE, Minister of Agriculture, Saskatchewan.

### Dominion Day Sports

Showers and threatening bad weather affect attendance. Good entertainment provided by well varied program. Kiddies enjoy free treat.

### Chinook Wins Baseball Tournament

### Fifth Fortnightly Crop Report

Issued by the Department of Agriculture, Province of Alberta, June 26 1931

A large section of the Province has received a plentiful supply of moisture during the past two weeks. Telegraphic reports reaching the Department from various sections of the Province today, indicate that prospects have greatly improved, particularly in the case of the later sown grain. The early sown wheat is heading out somewhat short in most places on account of the lack of moisture and high winds in the early part of the season. The later sown wheat, oats and barley are showing a fine stand in all districts where sufficient moisture has been received. This extreme weather, heat of the Province and a considerable area through the south-eastern section has not had sufficient rain and high winds are still prevalent doing much damage.

Pastures generally have improved rapidly during the past two weeks in the areas where precipitation has occurred. In districts where wind damage and where dry weather prevailed in the early part of the season, pastures have not yet revived sufficiently to provide

The second annual Dominion Day sports were run off on schedule, in spite of showery and threatening weather.

In the forenoon, a stiff wind was blowing and heavy clouds passed overhead with a threat of real wet weather. A few light showers fell but the sun struggled out, intermittently and it was generally felt by the committee that the program for the day might just as well be carried out. Shortly after 1 p.m. a heavy shower fell, but this seemed to clear the air, and the balance of the afternoon was bright and sunny. The threat of bad weather considerably reduced the receipts at the gate.

The sports included: a three team baseball tournament; a junior baseball game; a six team soft ball tournament for men; a four team soft ball tournament for ladies; a basket ball tournament; a long diving contest for golfers and a variety of races for children. All children under 12 years received 2 free tickets for ice cream, 2 free tickets for candy and 1 free ticket for a ride on the merry-go-round.

In the baseball tournament, Cereal got a bye. Oyen and Chinook played first, the game going to Chinook by the odd run in fifteen, Chinook 8, Oyen 7. Chinook defeated Cereal in the final game, 7-4.

The junior baseball game between Tom Lowe's "Pirates" and Leonard Gripp's "Cubs" was closely contested and finished 5-4 in favor of Tom Lowe's team.

In the men's soft ball tournament Oyen (Neid) defeated Excelsior, Benton defeated Oyen (Whitlock), and Cereal defeated Chinook. In the next round Cereal got a bye, and Benton defeated Oyen (Neid). In the final game Benton defeated Cereal 7-6.

In the first round of the ladies soft ball tournament, Oyen Grads defeated Excelsior and West Side defeated Oyen Elks. In the final game West Side nosed out Oyen Grads by one run. A feature of the game was the splendid fielding of both teams. Oyen Elks and Excelsior played off for the third

(Concluded on page 2.)

feed for stock.

Grasshoppers and cutworms have done some damage in isolated places. Taking the Province as a whole, however, this has been very slight.

Alfalfa is a heavy stand in the irrigated area. The first cutting has now commenced.

Warmer weather would be welcome but crops are growing rapidly over the greater part of the Province and all but the early sown grain gives promise of a good return except in the districts where moisture has not yet been sufficient.

### MILLER'S SPECIALS

Prices Good July 4 to July 10

Pink Salmon, halves	.. 69
3 lbs. Crisco and Free Mixing Bowl for	.. 82
Quaker Crackles	.. 10
3 lbs. Nectar Coffee and Free Cup and Saucer	.. 100

Beauty and sport, the heart of the famous Canadian Rockies are synonymous and as like attracts like it is not surprising to find such a heavy of beauty as is shown in the accompanying pictures, disporting itself in the beautiful swimming pools of the Canadian Pacific Hotel's palatial Banff Springs Hotel. There are two baths, one of naturally heated sulphur water and the other of ordinary stream water, both of which are extremely popular with the many visitors to the renowned summer resort. Recreations in infinite variety run the gamut of sports from golf to mountaineering. Real cowboys are on hand to take trail-rides through the innumerable nooks of the historic mountains, while Stoney Indians and scarlet-coated "Mounties" add yet another touch to the already colorful scene. Banff is something that has to be seen to be appreciated. Its devotees come yearly from the four corners of the globe. There is always something new, always something to do, and when the long busy day is over, dancing to the smart strains in the spacious ball room of the hotel

forms a fitting prelude to a restful night in the health-giving mountain atmosphere. Yes, Banff is beauty and beauty is Banff and the smiles on the faces of its mermaid-neck swimmers for the happiness of this great playground.

# Consolidation Of Debts Is Suggested As Solution Of Economic Problem In West

Only by reorganization and consolidation of debts will it be possible to remove the menace of fear and discouragement that oppresses the western farmers, merchants and other business interests, said Prof. W. W. Swanson, head of the economics department, University of Saskatchewan, and adviser to Premier R. B. Bennett, when he remarked now was the time to deal with the critical situation which had developed from crop conditions, frozen credits, low prices for farm products, by attacking the debt and credit problem on a comprehensive scale.

Dr. Swanson, who is in communication with the prairie premiers and Premier Bennett, said that the three most urgent problems are the depression in the west where debt adjustment, unemployment and provision for marketing the coming crop. He outlined a plan for dealing with these questions.

He considered that the debts should be divided into two categories: fixed and floating obligations. The fixed debts, which include mortgages, should be automatically extended without cost to the farmer for a period of three years, during which time steps could be taken to develop a plan for a more permanent settlement.

The second group of debts, oil, gas, accounts at country stores, bank loans and so forth, Dr. Swanson estimated amounted to \$250,000,000 and upward for the 250,000 farmers in the three prairie provinces.

He considered that these should be consolidated and paid by bonds with a substantial reduction in the interest rate. The federal government to pay one-third, the provincial government one-third, and the farmers the balance.

These bonds would have a life of three years, during which time all legal processes against farmers engaged in the scheme would be prevented.

## Pheasants For Manitoba

Efforts Made To Increase Game Resources Of The Province

The Provincial Government is co-operating with the Manitoba Game Protective League in introducing muskrats and muskrats pheasants into Manitoba. A shipment of 300 eggs is now en route from the British coast and will be distributed to experimental farms within the province. Experiments will be carried on with the two varieties to discover which is better suited to Manitoba climatic conditions.

Last year the Game Protective League distributed 4,000 eggs in small lots among individual farmers and it is estimated that 2,000 birds were hatched from these settings. Efforts to increase the game resources of Manitoba are designed both for the benefit of the resident and of the professional sportsman.

## New Agricultural Colony

Group Of Old Farmers Settle In British Columbia

Shell Lake, northwest of Prince George, has been selected by a group of old farmers as the site of British Columbia's newest agricultural colony. They have acquired most of the land around the lake and its settlers have arrived there to build homes for themselves during the present summer. More will come. A large community house has been built on the lake shore to accommodate the new arrivals while they are building houses and the equipment of the colony includes a portable sawmill for making lumber and an electric light plant. The colonists are developing their settlement without assistance from the government. They come from Youngstown, Ohio.

Germany has issued 3,500,000 Reichsmarks to owners of radio sets.

## Manitoba Live Stock Plan

Looking With Interest To Development Of Large Market In British Isles

Representative Manitoba live stock men unanimously favoured entry into a Canada-wide undertaking to establish a permanent plan for export marketing of live stock and live stock products. The plan involves direct overseas sale to a powerful English co-operative society. The proposal is to be placed before provincial bodies in Manitoba, Saskatchewan, Alberta, Ontario, Quebec and the Maritime Provinces.

It is intimated that the English society is willing to make the Canadian organization its sole representative in Canada if the Canadian body is prepared to make the English organization its sole representative overseas. Farmers of Manitoba and Western Canada are looking with interest to the possibilities of the development of a large live stock market in Canada if the British ships are prepared to take market sent to justify expectations of continued development.

## Winnipeg Newspaper Union

(By Annette)

ATTRACTIVE WRAP-AROUND FROCK

It's most attractive. The wrapped arrangement of the fronts are particularly slimming. At either side of the front below the patch pockets, inverted plaits flare the hem. The belt is concealed at the front, contributing further lengthened lines. It's jointly in marine blue cotton shirting fabric with white pin dots and plain white trim.

Style No. 560 can be had in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and 46-inches bust.

The 26-inch size requires 3 1/2 yards of 36-inch material with 3/4 yard of 32-inch contrasting lining, dimity, handkerchief lawn, cotton mesh and gingham, suitably coordinated.

Price of pattern 25 cents in stamps or coin (cash preferred). Wrap cloth carefully.

## Cheaper Summerfall

Light Cultivation To Keep Down The Weeds All That Is Necessary

Scientific agriculturists at Universities and Experimental Farms have recently been giving a good deal of thought to the question "Why Do We Plough?" Some experiments have been made, particularly by Mr. J. C. Taggart, Superintendent of the Dominion Experimental Farm at Swift Current, Sask., seem to indicate that under certain conditions one can obtain just as good results in our fields without so much ploughing.

The only reason for working the land in Western Canada should be to keep down the weeds. The only reason for summerfallowing should be to conserve moisture, but these two things are somewhat antagonistic. There should be no cultivating of the ground beyond the very minimum required to control weeds. Experiments show that shallow tillage is just as efficient for producing crops as deep ploughing, giving great evidence of shallow tillage, too, is considered to be less conducive to soil bonding than deeper tillage.

The suggestion is made, therefore, that under conditions where the method is practicable that farmers might save a great deal of money by simply cultivating stubble that is intended to be summerfallowed instead of ploughing it as usual, cultivating it not more than three inches deep and only at sufficient intervals to keep down the weeds, always remembering that it is the weeds that really rob the summerfallow of moisture.

The Agricultural Research Department of the Searle Grain Company could be very glad to have particular results from any farmers who have tried this method or who may try it this summer. The writer has marketed large fields by this cultivating method at Penn, Alberta, for three years running, and obtained results that were just as good as from adjoining fields that were ploughed in the usual method and, of course, at a much cheaper cost. The field seem to be even cleaner from weeds and the yield certainly just as good. The writer further noticed that in his plot where weeds are pulled by hand that greater yields were always obtained than on those plots where the weeds were cultivated with a machine, this certainly indicating that the land should not be stirred up by any implement any more than absolutely necessary to keep down weeds. —H. G. L. Strange.

## To Combat Outbreak Ravages

Danger May Possibly Be Worst Next Season Than At Present

In all probability the danger to crops from the pale western cutworm may be worse next season than this, and in this respect the use of the "indicator strip" is advised, states H. L. Seaman, of the Dominion Entomological Laboratory, Lethbridge, Alberta, in a letter to the Saskatchewan Bureau of Pesticides. Satisfaction that "indicator strip" sown this spring give a true indication of the extent of cutworm infestation has been expressed by the majority of farmers using this method, Mr. Seaman notes.

## Sale Refuted From Tax

Chemists at the Belfast Municipal Gas Works announced they had produced a non-inflammable petrol from coal tar oil which can do four more miles to the gallon than the ordinary gasoline used in automobiles. They assert there is no carbon monoxide in the exhaust engine knicks are eliminated and the fuel is cheaper than the present commercial article.

## DONN ENGLISH OUTFIT

Don Jaime, second son of King Alfonso of Spain, seems to be fully resigned to his exile. He is seen alone strolling through The Strand, London, England, dressed in unconventional English suit of navy blue with grey flannels.

## Canada Can Compete

Able To Hold Own With Russian Growers Or Those Of Any Other Country

Canadian wheat growers will be able to compete with Russian growers or those of any other country, in the opinion of a prominent official of the Canadian Wheat Pool. Europe will continue for generations to be a large importer of wheat and Canada has the greatest net comparative advantages of any country in being the source of supply, according to this official, who has recently made a personal study of conditions in Europe, including Russia. He believes that Europe will continue to require large quantities of foreign wheat and that Canada is in a perfect position to supply it.

## Minerals By Airplane

Radium Ore To Be Transported By Plane From Great Bear Lake

The transportation of mineral products by airplane may seem fantastic, but will actually be adopted in Northern Alberta. The fact that the mineral happens to be in radium explains its suitability for air transportation. Plans call for an airplane trip to Great Bear Lake during the present month returning with the first shipment of radium ore, of which it is expected that area will become an important producer.

## Sugar Maples In Canada

The natural range of the sugar maple in Canada extends from the Maritime Provinces to the Lake of the Woods in Ontario. In the forest it may reach a height of over 100 feet, but ordinarily does not average more than 75 to 80 feet in height and two to three feet in diameter. It occurs either in pure stands or is found associated with other hardwoods.

# History Of Water Power Development In Canada One Of Remarkable Achievement

## More Parking Space

Saskatchewan Providing Recreation Facilities For Tourists and Others

Saskatchewan is providing more parking space, not only for fivers but for tourists and holiday makers. Manitou Provincial Park, situated along the western shore of Little Manitou Lake, near Watrous, Sask., is now open. This is the first Provincial Park to be created in Saskatchewan under the direction of the Provincial Department of Natural Resources. A similar park is planned at Mudge Lake and plans are also made for others to serve different portions of the province.

The Canadian Government park north of Prince Albert, created a few years ago, has been a factor in furnishing helpful recreation for the population and in attracting tourists. It is expected that the new provincial parks will have a similar effect.

## Alaska Out Is Vigorous

Promises To Fill Important Place As Early Variety

Among the early varieties of oats, the Alaska, which has been receiving some considerable attention in recent years, giving great evidence of vigor and growth under field conditions during the present season. A field of registered Alaska oats under services in Eight County, Ontario, this spring has showed every evidence of rapidity of growth, stooping and general vigor. The Alaska oats matures at about the same time as the O.A.C. No. 3, and is somewhat stronger in the straw with a good quality of grain. It is one of the registrable varieties under the Canadian Seed Growers' association and promises to fill an important place as a vigorous strain sown early out.

## Have Real Grievance

Farm Women Object To Being Told They Have No Occupation

Commas declarations which refer to housewives as persons of "no occupation" came in for condemnation at the annual farm women's weekly convention at Saskatoon. It was declared that the wording of the commas declaration was a keen injustice to wives. They work on the farms from daylight to dark and now they are described as persons of "no occupation." It was felt that women, in many cases, were responsible for keeping farms in operation during the present depression. By the marketing of cream, butter, poultry, and eggs, branches of farming looked after by women, they had added materially in holding their lands and homes.

## Worked Up Good Business

Out of a job, a young New Yorker got an idea there was money to be made rehabilitating neckties, as Joseph Van Ranite tells the story. He started out by cleaning and pressing ties at 12 for \$1. Trade has become so brisk that he has invested in a delivery car, on the side of which are painted the words "Necktie Ambulance." A big city offers no end of ways of making a living for the man or woman with ingenuity.

Every calling has its compensations. Users are the only men who can put women in their places.

Each country develops its power-producing facilities along the most economically desirable lines and special facilities for power production constitute a definite national advantage. Canada possesses this advantage in a marked degree by reason of the extent and location of her water power resources which are such that, except for a relatively small proportion, her entire settled territory enjoys hydro-electric service. Not only is this true at the present time but there are sufficient undeveloped sites to assure the advantages of this service in the face of expanding demands and advancing settlement.

While complete information regarding the water power resources of the Dominion is not yet available, the Dominion Water and Hydro-metric Bureau of the Department of the Interior has collected and analyzed all the stream flow and power data that can be obtained with the purpose of preparing a reliable estimate of the total resources. This estimate places the total power ordinarily available twenty-four hours a day, and every day in the year, at over twenty million horse-power with an additional thirteen million available continuously for six months in the year. These figures are based upon an eighty per cent. efficiency of generation. As a matter of fact, power is seldom required continuously at a full load, and many sites are developed to produce considerably more than their capacity, rated at the continuous or even six months basis, they being able to store the flow at times of light load and draw upon it when the power demand is at its peak. An analysis of existing power installations indicates that the presently known resources would permit of a total turbine installation of approximately forty-four million horse-power.

The history of water power development in Canada is one of remarkable achievement; when the century opened the installation was only 173,000 horse-power, by the end of 1910 it had almost reached one million horse-power, ten years later it was over two and a half million, and at the end of the third decade it was well over six million horse-power.

The provision of this power for the use of "incalculable value, in addition, however, the hydro-electric industry has afforded much profitable employment to capital and to labour. It is estimated that a sum approaching \$1,500,000,000 has been invested in the industry. Of this amount, the industry employed 800,000,000 in 1930 and a further \$300,000,000 will probably be expended in the next few years.

## Sleepless Lose Height

Students Claim Loss Of Half Inch After Test

A loss of half a inch in height is claimed to have followed a 10-hour-of-sleeplessness experiment carried out by two University of Georgia students.

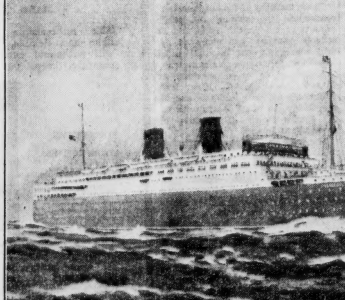

After their mental acuteness was decreased by half, concentrated attention was practically impossible; steadiness of nerves and co-ordination of mind and body were impaired. Eyes suffered strain, but sight was not affected. They found it most difficult to remain awake between 11 p.m. and 3 a.m. After two weeks of rest, following the experiment, their height was regained.

## Lindbergh May Fly North

Col. Charles A. Lindbergh has tentatively decided on the route for his second flight to the Orient. The first of this is to be a vacation trip and no definite schedule will be followed. He said that he and his wife were at present working on a course leading northward to Hudson Bay.

Cyprus has started two large reforestation projects.

## VESSEL PARTLY DESTROYED BY FIRE

Above is a picture of the \$7,000,000 Parnassia liner Bermuda, which was partly destroyed by fire and sank in Hamilton Harbour, Bermuda, shortly before it was to sail for New York with a big passenger list. The Bermuda is one of the largest motorships in the world. She is 350 feet long, 20,000 tons and has first-class accommodations for 613 passengers.

STORES CLOSE AT 1 P.M.  
Wednesdays during July

Rev. H. C. Woods farewell service at the United Church last Sunday was attended by a large congregation. Special numbers were rendered by a male quartette and a girls choir.

Miss A. M. Todd left yesterday for her home in Chinook where she will spend a few days before going to summer school at Edmonton.

Mr. and Mrs. James Lees and family left yesterday for Calgary. Mrs. Lees and family and Mr. and Mrs. E. Roberts will leave later in the week to spend a holiday at the coast.

Mr. W. S. Marshall and Mr. V. E. French returned to Oyen last Monday after a very successful fishing trip at Cold Lake.

Mr. and Mrs. V. E. French and family left today en route to Banff where they will spend a vacation.

Mrs. Morrell and son Frank are home from Hanna for the summer holidays.

Subscribe to the Oyen News!

Mr. E. G. Evans, principal of Oyen school for the last year, left yesterday for his home in Didsbury. From there he will go to Sylvan Lake to the boys camp till July 12, and then attend the camp at Gooseberry Lake.

Rev. and Mrs. H. C. Woods left Oyen last Monday by car en route to Rockyford, where Mr. Woods has accepted the Pastoral Charge.

Miss Etta Hatch returned to Oyen from Hanna early in the week, to spend the summer holidays here.

Mr. W. Desmond was a sports day visitor in town from Glendon, Sask.

Mr. A. J. Funnell, who is working on the staff at Bellarose's mill at Youngstown, spent Dominion Day in Oyen with his family.

Mr. and Mrs. H. A. Morrison and family and Miss Phyllis James, left today for Carbon. Mrs. Morrison and Donny will go to the coast for a two week's vacation, after a short visit in Carbon.

The complete Oyen school summer term promotion list will be published in the next issue of the News.

**Dominion Day Sports**

(Continued from page 1.)

The golfers long driving contest was won by R. J. Scott, J. R. Acheson was runner-up.

In the horseshoe contest Larson and Rude of Sedalia were first and R. Black and Monday of Oyen, second.

The picture show at Oyen Theatre was well patronized and an enjoyable time was reported by all who attended the dance.

The committee in charge desire to express their appreciation of the services willing given by all who assisted in making the day a success.

Mrs. Keover of Vulcan is the guest of her sister Mrs. M. G. Whitlock.

Mrs. I. Westfall and two sons Charles and Robert, of Danville, Ill., who arrived in Oyen last Tuesday, are the guests of Mr. and Mrs. Chas. P. Snyder.

Price lists for Oyen's seventeenth annual summer fair are in the mails this week. Those desiring copies should apply to Mr. J. P. Rorabeck, secretary.

A farewell party in being held tonight in Excel for Miss Hensel who is leaving for Edmonton to attend summer school.

Miss Bella Lees entertained a number of friends at a bridge last Saturday evening.

**EXCEL NEWS**

Mr. E. E. Vanstone has been fortunate in securing a good well near his buildings and is having one bored in his pasture. The work is being done by John Shields of Oyen.

Miss Hensel of Excel School, has been writing her Grade XII examination in Oyen. Mrs. E. MacArthur has been presiding during her absence from the school.

Mrs. F. E. Bishop and children and Mrs. R. E. Bishop and children attended the baby clinic in Laflin last Wednesday. Mrs. Ray, Anderson and daughter Gwyneth were present also.

Mrs. Thos. Stien, Mrs. M. E. Dibble and Mrs. C. A. Bishop attended a farewell picnic and tea at the home of Mrs. Wm. Agn. for Mrs. Torpy who is leaving Carbon in the near future for Saskatchewan where her husband Rev. F. E. Torpy has been stationed. Seventeen ladies were present representing the women's institute and the women's auxiliary, the former presented Mrs. Torpy with a table cloth and the latter with a Rayon bedspread. A dainty lunch was served in the shade of the trees.

Excel U.F.A. soft ball team played A. E. Johnson's "Giants" last Thursday evening and won the game. A return game played in Oyen last Saturday evening was won by the home team.

Mr. and Mrs. C. A. Bishop spent the week-end with Mr. and Mrs. R. C. Fraser of Naco.

Lorne Proudfoot, M.L.A., will speak at the picnic to be held on July 4, in J. R. Anderson's grove, under the auspices of Excel U.F.A. and U.F.W.A. Everybody welcome. Ladies please bring baskets.
